Kromschroeder

Optimal control and reliable safeguarding of gases require planners and service staff to have well-founded technical knowledge. Elster Kromschroeder supports advanced training for specialists by providing suitable training courses. New findings are imparted and knowledge is increased thanks to special courses involving a large proportion of practical exercises. Active participation in a specialist seminar is hereby attested by the present

Certificate of participation

Sven-Erik Zettervall

has taken part in the following specialist course and has hereby acquired the ability to put the experience and knowledge gained into practice at work.

Gas pressure controls

Gas safety and control valves

Industrial burner controls

Industrial gas burners

Osnabrück, 26.9.–29.09.2011
Elster GmbH
